SKILLS

- **Languages**: Java, Python Libraries, C++, Data Structure and algorithms, HTML, CSS, JavaScript
- **AI and ML**: Machine Learning, Deep Learning, Computer Vision, NLP, Generative AI, AI Tools
- **Tools/Libraries**: MERN stack, TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib, Google Colab, VScode
- **Database/Business tools**: MySQL, MongoDB, Power BI, Tableu
- **Soft Skills**: Problem-Solving, Team Work, Adaptability, Leadership, Time management

INTERNSHIP

Solar Secure (Virtual) | **Full Stack Intern** | Certificate — Feb'24 -Apr'24

- Developed a full-stack banking application using the MERN stack with secure JWT authentication .
- Implemented features like account dashboard, transactions, card management, and reporting with a responsive React interface which also has the updation of password and further details.
- Built REST APIs for secure CRUD operations and smooth frontend–backend integration using MongoDB and Express.

PROJECTS

HR Management System(HRMS)-MERN | Github — Feb'26

- Developed the GUI using Tkinter and Matplotlib with psutil-based continuous resource tracking.
- Integrated AI-driven risk analysis to flag deadlock conditions and built a multithreaded update loop for smooth live monitoring.
- Improved system reliability by detecting resource conflicts early and providing a responsive visual dashboard for real-time analysis.

QNN Customer Segmentation(Quantum neural networks) |Github — Mar'25

- Designed a hybrid Quantum–Classical Neural Network to improve customer segmentation accuracy using quantum computing principles.
- Built a quantum-inspired clustering system using Python (Pandas, NumPy, Matplotlib, Seaborn), manual scaling, sin–cos feature encoding, a custom K-Means algorithm, and 3D visualization tools.
- Secured segmentation precision and delivered a 24× speed improvement over traditional AI models with 93%.

TRAINING

Java with Data Structure and Algorithms| LPU | Certificate — Jun'24- Jul'25

Dynamic Contact Tracing Using Graphs | Github

- Built an IoT-driven graph-based contact tracing system to simulate infection spread across connected individuals.
- Created graph algorithms for dynamic contact mapping and implemented secure data encryption for safe information exchange by using Java application and BFS.
- Delivered a unified network-simulation system that identifies the optimal path between two IP addresses, integrating graph traversal, encryption, and real-time visualization.

CERTIFICATES

- Quantum Fundamentals | Wiser |Certificate — Dec'25
- Software Engineer| Hackerrank |Certificate — Nov'25
- Prompt Engineering| Internshala |Certificate — Mar'25
- Node.js, Mongo DB| Udemy |Certificate — Feb'24

ACHIEVEMENTS

- Secured Rank 663 on a LeetCode contest and ranking in the top 10.91% globally. — Nov'25
- Earned Google Introduction to Generative AI Badge |Google Cloud Skills Boost — Sep'25
- Achieved a 5 star rating in C and earned a Java badge on HackerRank by consistently solving programming challenges. — Mar'25

EDUCATION

- **Lovely Professional University** — Punjab, India
  Bachelor of Technology - Computer Science and Engineering; CGPA: 7.47 — Since Aug'23
- **NRI Arts and Science College** — Tirupati, Andhra Pradesh
  Intermediate; Percentage: 96.1 — Apr'21 – Mar'23
- **VSN Siddartha School** — Piler, Andhra Pradesh
  Matriculation; Percentage: 100 — Apr'20 – Mar'21
