# MEGHANA PASUPULETI

Linkedin: https://www.linkedin.com/in/meghana-0903sj/
Email: meghana7182@gmail.com
Github: https://github.com/Meghana0306
Mobile: +91-9346139699
Leetcode: https://leetcode.com/u/nxq5TWLgNd/

## SKILLS

- **Languages**: Java, Python Libraries, C++, Data Structure and algorithms, HTML, CSS, JavaScript
- **AI and ML**: Machine Learning, Deep Learning, Computer Vision, NLP, Generative AI, AI Tools
- **Tools/Libraries**: MERN stack, TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib, Google Colab, VScode
- **Database/Business tools** : MySQL, MongoDB , Power BI, Tableu
- **Soft Skills**: Problem-Solving, Collaboration, Adaptability, Research-Oriented Approach

## INTERNSHIP

**Solar Secure (Virtual) | Full Stack Intern** Feb 2024 -Apr 2024

- About: Designed a dynamic menu platform enabling category-based listing, displaying pricing, and ensuring UI responsiveness.
- Technologies used: HTML, CSS, Java Script, Node. js, Express. js

## PROJECTS

**HR Management System(HRMS)-MERN** | Github — February 2026

- Engineered a real-time deadlock detection dashboard to monitor system processes and identify potential failures.
- Developed the GUI using Tkinter and Matplotlib with psutil-based continuous resource tracking. Integrated AI-driven risk analysis to flag deadlock conditions and built a multithreaded update loop for smooth live monitoring.
- Improved system reliability by detecting resource conflicts early and providing a responsive visual dashboard for real-time analysis.

**QNN Customer Segmentation(Quantum neural networks)** |Github — March 2025

- Designed a hybrid Quantum–Classical Neural Network to improve customer segmentation accuracy using quantum computing principles.
- Built a quantum-inspired clustering system using Python (Pandas, NumPy, Matplotlib, Seaborn), manual scaling, sin–cos feature encoding, a custom K-Means algorithm, and 3D visualization tools.
- Achieved 93% segmentation precision and delivered a 24× speed improvement over traditional AI models.

## TRAINING

Java with Data Structure and Algorithms| LPU — Jun 2024- Jul 2025

Trained in Java and DSA at LPU with strong problem-solving skills

**Dynamic Contact Tracing Using Graphs** | Github — July 2025

- Built an IoT-driven graph-based contact tracing system to simulate infection spread across connected individuals.
- Created graph algorithms for dynamic contact mapping and implemented secure data encryption for safe information exchange by using Java application and BFS.
- Delivered a unified network-simulation system that identifies the optimal path between two IP addresses, integrating graph traversal, encryption, and real-time visualization.

## CERTIFICATES

- Software Engineer| Hackerrank |certificate — November 2025
- Prompt Engineering| Internshala — March 2025
- Node.js, Mongo DB| Udemy — February 2024

## ACHIEVEMENTS

- Achieved Rank 663 in a LeetCode contest among thousands of participants. — November 2025
- Earned Google Introduction to Generative AI Badge |Google Cloud Skills Boost — September 2025
- Built an Arduino-based light-pattern automation project selected for the University ISC showcase — January 2024
- Served as an NSS volunteer for one year, contributing to social outreach programs. — Dec 2023 – Dec 2024
- Participated in a university hackathon focused on rapid prototyping and teamwork.

## EDUCATION

- **Lovely Professional University** — Punjab, India
  *Bachelor of Technology - Computer Science and Engineering; CGPA: 7.4* — *Since August 2023*
- **NRI Arts and Science College** — Tirupati, Andhra Pradesh
  *Intermediate; Percentage: 96.1* — *April 2021 - March 2023*
- **VSN Siddartha School** — Piler, Andhra Pradesh
  *Matriculation; Percentage: 100* — *April 2020 - March 2021*
